JOB TITLE: DevOps Engineer

Looking to make an impact on a rapidly growing organization and be recognized for it? Seeking a flat organizational structure with easy access to decision makers and team members alike? Yearning for work flexibility? Searching for unlimited opportunities to develop expertise in cutting-edge technologies and to expand and grow professionally? Desiring all that in a high-energy, enthusiastic and UN-corporate environment? You've come to the right company!

IKINDI is looking for a talented DevOps Engineer who will primarily be involved in developing infrastructure for automated solution deployment using JVM-based tools in addition to developing solutions for both client and internal deployment.

Qualifications and experience:

Skill set requirements:
1. Strong operational experience in code deployment and rapid deployment of systems and applications

2. Strong experience in development of infrastructure for automated solution deployment using JVM-based tools

3. Strong software development experience using open source tools such as Linux, Java, mysql, Java and JVM-based languages such as Clojure

4. Strong software development experience in web-enabled delivery of services (e.g. Cloud computing delivery model)

5. Strong experience with "continuous" approach to builds, testing, integration and delivery

6. Strong experience with automation and provisioning frameworks

7. Strong experience developing and automating deployment tools to support IaaS platforms

8. Working knowledge of Dev/Ops best practices, implementation strategies and integration strategies

9. Working knowledge of software deployment tools - e.g. source control management, issue management etc.

10. Compelling track record of creative out-of-the-box problem-solving with a team-oriented approach, lots of self-initiative and ability to work independently, ideally within the asset management industry

Integrators of Knowledge

11. Proven development experience amid highly time-sensitive settings with infrastructure and resource challenges, and continuously shifting priorities and approaches, ideally with client-facing experience

12. Flexibility and composure in dealing with challenging and demanding internal and client-facing situations with the ability to negotiate viable compromises, if imperfect solutions

13. Strong experience in the development of Front Office, Middle Office and Back Office systems, ideally at asset management firms

14. Strong experience in the development of business/functional/technical specs

15. Strong experience writing RFPs, responding to RFPs, and evaluating RFPs

16. Experience in 3rd-party software solutions in the areas of performance/attribution, portfolio accounting, benchmark data management, or, risk management.

About IKINDI

IKINDI Inc. is a leader in business process and data integration solutions within the asset management Middle Office space. IKINDI serves Institutional and Retail Investment Management firms, Retirement Plan providers and Banks to streamline their day-to-day business flows as they undergo complex or difficult operational change whether driven by acquisitions, outsourcing decisions, regulatory change or industry challenges.
